Graduate Success Story

Blake Diaz, a February 2023 Carpentry & Construction Technology Graduate from Triangle Tech, Sunbury

“Acquiring my associate degree in Carpentry and Construction Technology was one of the best decisions of my life. I want to give credit to Blair Faust, my employer at Knoebel Lumber, Elysburg. (H. H. Knoebel and Sons, Inc.). I was working part-time and wanted to go full-time. But Blair suggested, I consider going to school at Triangle Tech to gain skills in the Carpentry field to benefit my career/ my future. Then after graduation, I would be promoted to full time, gain a pay increase, be eligible for benefits, paid time off, and much more. I had always enjoyed tinkering around doing small projects like building bird houses and enjoyed the Carpentry field. Plus, Triangle Tech is local to Knoebel Lumber; Knoebels Amusement Resort which made it a sensible choice.”

“When starting school, I wasn’t sure about some of the math calculations. There were some calculations that were new to me; but my instructors and classmates all came together and were always eager to help. We were all in it together forming friendships that will last throughout our lifetime. I stayed motivated by focusing on my future career at Knoebel Lumber. The instructors were wonderful, and the students were great and grew in confidence.”

“After graduation, I acquired my full-time position, better pay, paid time off, and benefits beyond my expectations. I also gained a work family; one I never would have experienced without my education at Triangle Tech. As a carpenter/ installer my duties include remodeling bathrooms and kitchens, building decks, installing siding, replacing doors and windows. My training in construction, remodeling, cabinetry, flooring, framing, and installing bathroom fixtures and plumbing has prepared me to be confident in my work.”

“My advice to new and current students’ is don’t be afraid to try something new. Even if you think you won’t like it, try it anyway. Put in the work and effort stick to it, sixteen months pass by before you know it. I was nervous the first day and unsure of myself and my abilities. Unsure how far this decision to enroll at Triangle Tech was going to take me. But I am so happy I took advice from Blair Faust and started school. It was one of the best decisions of my life. I plan to stay in the construction field gaining skills and experience to grow my career with Knoebel Lumber.”

Blair Faust, Director of Resort Operations for H. H. Knoebel Sons, Inc. had this to say, “As someone who has hired graduates from Triangle Tech, I want to tell you the benefit to the student and employer. On May 2020, I hired Blake Diaz, he started working part-time as a seasonal carpenter assistant with no benefits and no overtime compensation. One day, Blake approached me about the possibility of working full time. He was earning \$15 per hour. At that time, I had a conversation with Blake and explained the benefit of furthering his education. It took some effort, but I convinced him to enroll at Triangle Tech, Sunbury. He agreed and in sixteen months Blake graduated with his AST degree in Carpentry and Construction Technology. Now, I have a skilled full-time carpenter and Blake has a full-time carpenter position, higher wages, health care plan, paid holiday's, over-time options, 401K, profit share, and more. It was a positive benefit to Blake’s career when he decided to attend Triangle Tech.”

While Blake attended school, he had the opportunity to work at Knoebels Amusement Resort at the Christmas Village during his winter break. Faust said “Triangle Tech has been a great resource for skilled labor at Knoebel’s for carpenters, maintenance electricians and the welding field, as well. The graduate gains a life sustaining career in their trade, and the employer gains skilled laborers which are in dire need in today’s world.”

Blake said, “My overall experience at Triangle Tech is something I will draw from throughout my entire career whether it be education, social,

The following 130 graduates of Triangle Tech were recently hired.
