Graduate Success Story

Jason Charlton, a June 2014 Maintenance Electricity Graduate from Triangle Tech, Greensburg

“At this time I would like to thank Triangle Tech and its Career Services Department because without them and their dedication to excellence, I would have not been able to get the new career I have. I would not have received all of the different opportunities that I received without Triangle Tech's commitment to training and making sure that we strive for our best outcome no matter what we do. I would just like to say thanks again to the Staff and Instructors for making this a memorable experience.”

Jason came to Triangle Tech after several successful years in the workforce and military. Jason was very proud of his skills, but felt that he was missing one thing.....a degree! He wanted to take advantage of advanced career opportunities that he could apply for once he earned his degree, and he did just that. Jason had the opportunity to interview on-campus with recruiters from Alstom Grid in Charleroi, PA. Alstom is a world leading manufacturer of engineered solutions for electrical grid applications in utility and industry settings. The Group provides integrated and customized turnkey solutions such as alternating current and direct current substations from medium up to ultra high voltages. Jason was hired by Alstom and is currently a Field Service & Commissioning Technician.

Jason performs electrical repairs & maintenance within power substations across the United States. Jason will be traveling to Italy soon for additional training.

The following **625** graduates of Triangle Tech were recently hired.
