Graduate Success Story

James Hutton, a June 2019 Welding and Fabrication Technology Graduate from Triangle Tech, DuBois

"I enrolled in the Welding & Fabrication program at Triangle Tech because I needed additional training and education required to further my career as a welder fabricator.

I am very pleased with the time I spent at Triangle Tech and experience and knowledge I received from the instructors and students. Going back to school at my age was a little difficult considering I had been out of high school for 20 plus years but with lots studying and support from the instructors and students I graduated top of my class with honors.

Once I graduated I immediately was offered several jobs including a position at Triangle Tech as one of their welding instructors. After lots of consideration I chose a position at my current employer, Staar Energy Services as their Field Service Manager. My job at Staar requires me to manage, and maintain 2 welding trucks and all field service projects. Thanks to my training at Triangle Tech I am able to do so with ease. I refer Triangle Tech every chance I get to students that are still in high school and adults looking to further their education. It's a wonderful school to attend and better your education."
