Graduate Success Story

James Lukashonak, an October 2021 Carpentry & Construction Technology Graduate from Triangle Tech, Bethlehem

“I decided to attend Triangle Tech for a few reasons. I wanted to make my parents proud by being their first son to get a degree. I chose Triangle Tech because it took a shorter amount of time to get the degree, and because I have established from a young age that I wanted to become a carpenter. Therefore, I selected the Carpentry and Construction Technology program because I wanted to learn how things were built and wanted to further my carpentry knowledge.

What I liked best during my time at Triangle Tech was that I was able to ask questions/ opinions from my instructors on side jobs that I was doing. The instructors made class fun and enjoyable, and my fellow classmates became my good friends. The areas of the program that I enjoyed the most were definitely drywall installation and finish, interior mill-work, cabinetry, roof framing, and related trades.

Upon graduating and earning my degree, I wanted to achieve a job in the carpentry field and actually have an understanding of different carpentry aspects. My position in the Carpenters Union is a 1st-year Apprentice Commercial Carpenter working for DPR Construction. I absolutely hit the ground running. I became an apprentice a week after I graduated from Triangle Tech and have been told that “this apprentice knows what he’s doing”. I believe that Triangle Tech has definitely put me a few large steps ahead than other apprentices who have not been taught at Triangle Tech.

Some advice that I have for the current Triangle Tech students is to show up to school on time. Don't be afraid to start some side jobs. Most importantly, the instructors at Triangle Tech are former contractors, owners of their own businesses, and have been in the trade a long time. They have tips and tricks that you may never be taught at the job site pick them up and use them.

My future goals are to become a Journeyman Carpenter, which is obtained after being an apprentice for four years. I also would like to start my own company and be as knowledgeable as my former instructors.

The following 155 graduates of Triangle Tech were recently hired.
